GiridharRaj Sonti

Chennai, India | +91 9440436999 | giridharrajsonti@gmail.com

PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in AI & ML, with hands-on project experience in machine learning applications, time-series forecasting, data preprocessing, and automated API testing using Python. Experienced in model evaluation, feature engineering, REST API validation, and debugging. Strong foundation in data structures, algorithms, object-oriented programming, and database fundamentals. Interested in developing reliable, maintainable AI solutions for enterprise applications.

EDUCATION

SRM Institute of Science and Technology, Ramapuram — Chennai, India
B.Tech in Computer Science and Engineering (AI & ML) — Sep 2023 – Jun 2027
CGPA: 8.0/10

Wisewoods International School — 2023
Class XII — 78.6%

TECHNICAL SKILLS

Programming: Python, SQL, JavaScript

Machine Learning: Scikit-learn, Supervised Learning, Classification, Feature Engineering, Model Evaluation, Statistical Modelling, Time-Series Forecasting, ARIMA

Data Processing: Pandas, NumPy, Matplotlib, Data Cleaning, Data Preprocessing, Data Transformation, ETL Concepts, PySpark (Basic)

AI Application Development: Streamlit, REST APIs, Django, React, JSON, HTTP Methods and Status Codes

Testing and Debugging: Pytest, API Testing, Functional Testing, Test Automation, Negative Testing, Debugging

Core CS and Databases: Data Structures and Algorithms, OOP, DBMS, MySQL, PostgreSQL, Exception Handling, SDLC

Tools and Cloud: Git, GitHub, VS Code, AWS Fundamentals

PROJECTS

Customer Churn Prediction System — *Python, Pandas, Scikit-learn, Streamlit*

- Developed an end-to-end machine learning application to predict customer churn risk using Python and Scikit-learn.
- Processed 7,000+ telecom customer records through data cleaning, preprocessing, feature engineering, and transformation.
- Trained and compared Logistic Regression, Decision Tree, and Random Forest models using accuracy, precision, recall, F1-score, and ROC-AUC; reported ROC-AUC of 0.82 for the selected model.
- Integrated preprocessing and model inference into an interactive Streamlit application for user-driven predictions.

Electric Vehicle Battery Performance Forecasting — *Python, Pandas, ARIMA, Matplotlib, PySpark*

- Developed a time-series forecasting workflow covering data preparation, model training, prediction, and visualization.
- Performed exploratory data analysis, data cleaning, and feature preparation using Pandas and Matplotlib.
- Implemented ARIMA forecasting and compared predictions with historical observations to assess model performance.
- Used PySpark DataFrames for data processing and ETL exercises.

Automated API Testing Framework — *Python, Pytest, REST APIs, SQL*

- Developed a reusable Python and Pytest framework to validate REST API responses, HTTP status codes, and request-handling behaviour.
- Created test cases for positive, negative, boundary-value, and edge-case scenarios to evaluate API reliability.
- Investigated test failures, validated response data, and organized the test suite for repeatable execution; maintained project code using Git and GitHub.
